Generative   Pre-trained   Transformer

computer science is to practice coding regularly. Start by working on simple exercises and gradually move on to more complex projects. 4. Participate in coding challenges and competitions: Coding challenges and competitions provide a great opportunity to put your skills to the test

the observation to his next neighbour, and added, "I'd hold half a guinea that _he_ don't get no law-work to do. Don't look like the sort of one to get any, do he?" Yet, this Mr. Carton took in more of the details of the scene than he appeared to
